

# Progressive Prosthetics

Summer 2006

serving dentistry since 1913

## Welcome Back!

Our first edition of Progressive Prosthetics was produced in January 1923. For over 90 years we have been closely involved in every new idea, new method, and new process to the extent that our history reflects the history of dental prosthetics during that time.

The principles to which we pledged ourselves in the first edition remain the same - responsible and experienced advice to our customers, rigorous testing of all new processes and materials, individual care and scrupulous attention to detail.

# Attenborough Scores Quality Hat Trick

BS EN ISO 9001:2000  
CERTIFICATE# FM11997

In April 1991 we became the first lab in the UK whose quality system was certified to BS5750 part 2. We have now successfully completed migration to the ISO 9001:2000 standard under 3rd party UKAS accredited audit by the BSI, underlying our ongoing commitment to the Total Quality Management of all processes in our Organisation by Senior Management and all our team.

We are delighted to have been awarded Investors in People accreditation. Implementation of the IIP standard has enhanced the long-standing tradition of training process embodied within our ISO 9001:2000 programme by the specification of a formal corporate training policy for all members of our team.

We are also the first lab to achieve the Dental Appliance Manufacturers Audit Scheme (DAMAS) accreditation under BSI audit.

Such high level commitment to both ISO 9001:2000 and DAMAS demonstrates our guarantee to meet or exceed the pre-requisite level of compliance required by PCTs and increasingly by many of the Bodies Corporate.

This has helped us to identify the individual needs and ideas of our people and provided a framework for Continuing Professional Development (CPD) delivering new and innovative products and services.

The IIP standard has realised improved performance and communication across our Organisation. In turn this has helped us to demonstrate compliance with the new regulatory and legislative requirements for GDC registration of our team.

Sharon Newton (Attenborough Dental), Edward Attenborough (Director)  
David Kerry (Workforce Development Manager - Business Link)

We are also delighted to have been awarded Platinum Status by Straumann to create the highest quality restorations using their ITI implant system.

For more information on our extensive implant lab service please contact one of our team.

# Beautiful Chromes don't have to cost the Earth

In 1951 we were the first lab to introduce cast cobalt chrome dentures into the UK, so our experience is second to none.

Whatever your requirement we have a solution to hand, including our expert framework design service.

We also have in depth knowledge of precision attachments, having worked over the years with virtually every system available.

With prices starting from £34.99 for a full upper (stippled finish) our prices are hard to beat.

## Luxene Low-Allergenic Dentures

Patients are becoming increasingly sensitive to polymerised monomer-based acrylics, so to meet their needs we have re-introduced the well proven Luxene® injection moulded vinyl acrylic denture system, with high quality finishes in a wide range of shades.

## Ultraflex Dentures

In compliment to our Luxene® injection moulded vinyl acrylic denture system, we now offer Astron Ultraflex® flexible injection moulded dentures for superior retention and comfort - contact one of our team for more details.

## Gum Tinted Dentures

All our Premier dentures are now finished as standard with gum tinting for superior aesthetics. Please contact one of our team for characterisation options and shades.

## Light Cured Waxes

We now offer a FastTrack Express 36-Hour in lab service for our Cobalt Chrome bases using light cured waxes. Please contact one of our team to make a time reservation.
